First Prompt:

"*A pig flying in space using angel wings"*

AI Model used to render the prompt: Pippit AI

Output: https://github.com/emluzon2-debug/21st-Century-IT-Skills-2nd-Sem-2025/blob/main/Pig%20Flying%20in%20Space%20Using%20Wings%20Prompt%201.mp4

Refinement of Prompt Using Gemini AI

can you improve or reformulate this statement:A pig flying in space using angel wings

Show thinking

That is a wonderfully surreal and imaginative concept! Depending on the exact vibe you want to capture, here are a few ways to improve or reformulate the statement:

Majestic & Poetic

- A celestial swine soaring through the cosmos on ethereal angel wings.
- Borne aloft on feathered wings of light, a humble pig glides through the starry void.
- An angelic pig navigating the quiet vacuum of space with graceful, sweeping wings.

Whimsical & Humorous

- Defying all laws of physics and farmyards, a pig flaps its angelic wings across the galaxy.
- A majestic, winged pig casually taking a stroll through the Milky Way.
- When pigs fly—and achieve low Earth orbit on the wings of an angel.

Epic & Sci-Fi Blend

- An interstellar pig propelling itself through the cosmos with the radiant beat of angel wings.

Epic & Sci-Fi Blend

- An interstellar pig propelling itself through the cosmos with the radiant beat of angel wings.
- A space-bound swine traversing the nebulae, guided by divine, feathered wings.

Short & Punchy

- An angelic pig soaring through space.
- A cosmic pig on angel wings.
- A winged swine drifting through the stars.

Best for AI Image Generators (If that's your goal)

- *A highly detailed, cinematic shot of a cute pink pig flying through a starry outer space galaxy, propelled by majestic, glowing white angel wings, surrealism, digital art.*

What kind of project are you using this line for (e.g., a creative story, an art prompt, a joke)? Let me know, and we can tailor it even further!

Prompt 2

A highly detailed, cinematic shot of a cute pink pig flying through a starry outer space galaxy, propelled by majestic, glowing white angel wings, surrealism, digital art.

Reflection

Based on the outputs of the LLMs, the second prompt was run through Gemini, the second output was better and provided clearer results. The reason why the second output is better compared to the first output of the first prompt is because the second output is specifically prompted to make the first prompt better and clearer. Gemini even gave an output prompt that's specific to AI image generators. On the other hand, the output of the first prompt did give results that is close to the intended output but it lacked some details. Finally, the thing that I learned about prompting is that it is needed to give specific and detailed prompts so that the AI will know on what to create, and that being unclear will result to an output that is not in line with the given prompt, or the output lacks details.
